

March2Success is your **FREE** online resource hub, designed to empower users to boost their performance on critical standardized tests. Whether you're gearing up for the ASVAB military entrance test, the Armed Forces Classification Test (AFCT), or college entrance exams, we've got you covered.

March2Success offers a range of resources to meet the diverse educational needs of our users:

College and Vocational Prep: Access our online courses and practice tests to confidently prepare for the ASVAB, and other assessments such as college entrance exams like ACT and SAT. We also provide resources to guide you through the college application process.

STEM Education: Explore lessons and practice tests designed to reinforce crucial concepts in STEM. Our offerings cover Math, Science, Social Science, and Technology.

Healthcare Professionals: For those pursuing careers in healthcare, we offer full-length practice tests for exams such as the MCAT, DAT, and various Nursing examinations.

ASVAB and AFCT prep - General Technical Mastery & High School Math & Verbal Skills

We are pleased to offer the March2Success General Technical Mastery module to help prepare for the ASVAB and other vocational careers.

The self-paced, asynchronous online course starts is designed to help students assess and improve upon academic and vocational skills commonly taught in high schools across the United States. Students begin by taking a diagnostic ASVAB test. Upon completing the diagnostic exam, students will be provided with their results for each subject test, as well as their composite scores, including their General Technical score.

The prescriptive training course provides individual lessons for each learner based on the results of their diagnostic test, featuring engaging multimedia lessons, videos, and gamified exercises. These help teach and develop skill mastery in all sections of the ASVAB. Finally, students will see a summative assessment in the form of a full-length ASVAB exam.

For learners looking for **more practice, two additional standalone exams are available, as well as flashcard decks for vocabulary and math and science formulas.**

Getting Started: To get started, first you must register for an account at: <https://www.march2success.com>. Once you have completed the registration process, you can login and immediately access all course and practice test materials. For a quick tour of the site and how to use its features, please view the March2Success Overview demonstration. <https://www.march2success.com/demos/showdemo/overview>
